Inaxsys Technical Training

Tuesday, June 14, 2016 • 9:00am – 4:00pm

ADI Burnaby

3144 Thunderbird Crescent • Burnaby, BC V5A 3G4
604-291-8401 • burnaby.ca@adiglobal.com

Join Mark McRae and Joanne Robertson for a full day of Inaxsys technical training or choose the training that suits your needs:

9:00am - 9:30am
Introduction to Protégé WX
The most powerful stand-alone integrated access control/intrusion system in the world.

9:30am - 10:45am
DIN-RAIL Hardware Overview
Configuring WX controller and modules: wiring, power, addressing, types of modules, basic programming via the web interface
--------------------------BREAK --------------------------

11:00am - 11:30am
Introduction to Protégé GX
The most powerful centrally-managed integrated access control/intrusion system in the world

11:30am – 1:00pm
Using DIN-RAIL hardware in a global Protégé GX system
Programming, database management, floor plans, status maps, video integration, elevator control, analog data acquisition, RS-485 readers with DESFire protocols (extreme card security)

--------------------------BREAK --------------------------

1:30pm to 2:00pm
Introduction to the STORM line of video products
IP video and the revolutionary High definition Composite Video Interface (HD-CVI) recorders.

2:00pm to 3:00pm
An upgrade from analog to Storm HD-CVI
Discover how easy it can be.
--------------------------BREAK --------------------------

3:15pm to 4:00pm
Integrating STORM IP and STORM HD-CVI
Integrating Storm IP and Storm HD-CVI under one user interface for the perfect high-definition video solution for now and the future – with Questions and Answers and application design (drive calculations, RAID explanation and intelligent video analytics)
